Square

No Base

	Wide	Around
Round		
Pyramid		
Square		
Pole only		

2) Measure the height of your tallest concrete base. _____ "Height

- Poletectors are 38" tall and will give your parking lot a uniform height. We include foam to provide support even if your bases are shorter than 38".
- Measure from the ground to the top the metal anchor bolt cover.

3) Measure your light pole.

- Determine if you have a ROUND or SQUARE light pole.
- We will custom cut top to fit your pole. Cut out will be 1" larger than the size of the light pole.

_____ " Square Light Pole

_____ " Round Light Pole

Example 6" Round
